

LIST OF US SPONSORS WITH RTT CARBON SEQUESTRATION FORESTS IN COSTA RICA

Reforest The Tropics
19-Jan-09

The purpose of this UNFCCC/AU applied research program is to demonstrate the management of US CO2 emissions through sequestration in tropical farm pasture reforestation projects in Costa Rica.

In red project with educational institutions

	Sponsor	Type	Year funded	In CT	Acres	Planted per year
1	Hartman, John & Kelly	Foundation	1998	x	1.0	
2	Perrine, Hugh	Retired	1998		1.0	
3	Hintlian, Harry (#1)	Businessman	1998		1.0

		267.2	168.2					22,761	

new

note: This forest, number 31, was planted in July, 2002. It is producing offsets to be sold as tons to buyers as a marketing study. Management in this forest is different that the others, in that the total carbon in the stand may not be lower after thinnings than the total amount sold. The farmer has been advised.
